Welcome to the Mercer Lecture Series

Establishing future direction for those involved in the geotechnical, geosynthetics and civil engineering fields.

DR. -ING MICHAEL HEIBAUM – 2012/2013 MERCER LECTURER

Dr Heibaum will be delivering his lecture on:

GEOSYNTHETICS FOR WATERWAYS AND FLOOD PROTECTION STRUCTURES – CONTROLLING THE INTERACTION OF WATER AND SOIL

You will be able to [access the full abstract here](#) and attend his lecture at the following locations:

12th Baltic Sea Geotechnical Conference, Rostock
31st May – 2nd June, 2012
[Click here to register](#)

ANZ 2012 – Ground Engineering in a Changing World, Melbourne
15th – 18th July, 2012

Sponsored by:

Tensar.

Background:

The Mercer Lecture is a biennial lecture sponsored by Tensar International, with the endorsement of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE) and the International Geosynthetics Society (IGS).

The series was established in 1992 to provide individuals who have made significant technical contributions to the advancement of geosynthetics the opportunity to present their work at international conferences around the world. They are held in honor of the late Dr Brian Mercer, the inventor of geogrids and a strong advocate for innovation, research and development. For more information about Dr Mercer, [click here](#)

The key objective of the lecture is to help promote the co-operation of information exchange between the geotechnical engineering profession and the geosynthetics industry by giving an eminent practitioner the opportunity to undertake a lecture tour on the subject of Geosynthetics in Geotechnical Engineering.
