

# Volume 1 - Table of Contents

## Welcome Lecture

Brazilian research and practice with geosynthetics <i>S.S. Sandroni, L.G. de Mello, R.C. Gomes, O.M. Vilar</i> .....	3
---	---

## Prestigious Lecture

Development of criteria for geotextile and granular filters <i>J.P. Giroud</i> .....	45
---	----

## Giroud Lecture

Geosynthetics application for the mitigation of natural disasters <i>H. Brandl</i> .....	67
---	----

## Keynote Lectures

Geosynthetics barrier systems for dams <i>D. Cazzuffi, J.P. Giroud, A. Sciuero, G. Vaschetti</i> .....	115
---	-----

Geosynthetics in pavement reinforcement applications <i>S.W. Perkins, B.R. Christopher, N. Thom, G. Montestruque, L. Korkiala-Tantt, A. Watn</i> .....	165
---	-----

Improving the performance of mining infrastructure through the judicious use of geosynthetics <i>A.B. Fourie, A. Bouazza, J. Lupo, P. Abrão</i> .....	193
--	-----

## Discussion Sessions Papers

### Code of Practice for Reinforced Soil

Introduction to international codes for reinforced soil design <i>S.P. Corbet, G. Horgan</i> .....	225
---	-----

EBGEO 2010 - Recommendation for reinforcement with geosynthetics <i>G. Bräu, A. Herold, J. Lüking, O. Naciri</i> .....	233
---	-----

USA design guidelines for geosynthetic reinforced soil walls, slopes and embankments <i>B.R. Christopher</i> .....	237
---	-----

British standard code of practice. BS8006 <i>C. Jenner</i> .....	243
---	-----

Introduction to Japanese codes for reinforced soil design <i>F. Tatsuoka, J. Koseki, M. Tateyama</i> .....	247
---	-----

### Geosynthetics in Agriculture and Aquaculture

Geosynthetics in agricultural and aquacultural applications <i>M. Heibaum</i> .....	259
--	-----

Erosion control methods using geosynthetics in agriculture and aquaculture <i>E.C. Shin, J.K. Kang</i> .....	273
---	-----

Geosynthetics in Geocontainers	
Geotextile containers for coastal and hydraulic engineering structures made of specially designed nonwoven geotextiles	
<i>G. Heerten</i> .....	287
Geotextile containment	
<i>C. Lawson</i> .....	307
Geosynthetics in Landfills	
Geosynthetics applied in waste landfills and containment facilities	
<i>T. Katsumi, T. Inui, H. Ishimori, M. Kamon</i> .....	323
Geosynthetics in Mining Engineering	
On the compatibility of GCLs to leachates of extreme chemistry	
<i>A. Bouazza, W.P. Gates</i> .....	345
Creating a new thought process to specify geomembranes for heap leach applications	
<i>M. Ossa Defilippis</i> .....	359
Geosynthetics in Pavements	
Geosynthetics for road pavements: European contributions	
<i>A. Watn, I. Hoff</i> .....	367
Geosynthetics in Pavements: North American Contributions	
<i>J.G. Zornberg, R. Gupta</i> .....	379
Geotextile Filter Clogging	
On the clogging of geotextile filters	
<i>R.J. Fannin</i> .....	401
Geotextile filter: Design, characterization and factors affecting clogging and blinding limit states	
<i>N. Moraci</i> .....	413
Long-Term Performance of Geosynthetics	
Long-term performance of geosynthetics	
<i>B.S. Bueno</i> .....	439
Long term performance of geosynthetics	
<i>J. Müller-Rochholz, J. Retzlaff</i> .....	455
New Techniques for Soft Soil Stabilisation Using Geosynthetics	
Prefabricated vertical drain (PVD) enhancement by using surcharge, vacuum and heat preloading in soft Bangkok clay improvement	
<i>D.T. Bergado, J. Saowapakpiboon, J.C. Chai, P. Voottipruex</i> .....	465
Electrokinetic strengthening of soft soil	
<i>C.J.F.P. Jones, J. Lamont-Black, C. White, S. Glendinning, J. Hall</i> .....	487
Performance of Geosynthetics in Environmental and Hydraulic Applications	
A systems engineering approach to minimizing leachate leakage from landfills	
<i>R.K. Rowe, M.S. Hosney</i> .....	501
State of the art and durability insights regarding the use of geosynthetics for lining in hydraulic and environmental applications	
<i>N. Touze-Foltz</i> .....	511

Retaining Walls Design and Performance	
Current issues for the internal stability design of geosynthetic reinforced soil	
<i>R.J. Bathurst, T.M. Allen, B.Q. Huang</i> .....	533
Reinforced soil wall measurements and predictions	
<i>M. Ehrlich, L.D.B. Becker</i> .....	547
Soil-Geosynthetic Interaction	
Soil-geosynthetic interaction: Interface behaviour	
<i>N. Dixon</i> .....	563
Determination of soil-geosynthetic interface parameters	
<i>A.L.L.S. Nunes, A.S.F.J. Sayão</i> .....	583

## Volume 2 - Table of Contents

### Geosynthetics Testing and Properties

In isolation cyclic load-extension behaviour of a geocomposite	
<i>C.S. Vieira, M.L. Lopes, L.M.S. Caldeira</i> .....	593
Analysis of deformation mechanism with stress-strain behavior of geogrids by FEM	
<i>H.Y. Jeon, E.H. Ko, S.E. Yoo, S.Y. Kim, K.Y. Lee</i> .....	597
Tensile testing method and material variability effects in the tensile behavior of PET geogrids	
<i>M.V.W. Campos, J.L.V. Silva, F.A.N. França</i> .....	603
GCL shear strength evaluation – A new test method	
<i>V.E. Pimentel, B.S. Bueno</i> .....	607
Application of plastic optical fiber sensor for large strain measurement in geotextile containers	
<i>C.Y. Tan, K.S.C. Kuang, S.H. Chew</i> .....	613
Evaluation of Round robin laboratory testing on nonwoven geotextile according to NorGeoSpec requirements	
<i>T. Damtew, J. Vaslestad, H.L. Moe, P.K. Hoel</i> .....	617
Evaluation of unconfined axial compression of Guabiro tuba formation soils with woven geotextile incorporation	
<i>J. Reinert, S.B. Bovo</i> .....	621
Analysis of geogrid engineering performance by certification points of view	
<i>S.H. Cho, H.Y. Jeon</i> .....	627
Determination of geosynthetic materials resistance to cyclic loading	
<i>I.P. Gameliak, G.V. Zhurba, V.V. Kostrycky, L.A. Dmitrenko</i> .....	631
Compression tests for EPS blocks used in geotechnical engineering	
<i>J.O. Avesani Neto, B.S. Bueno</i> .....	635

Investigation of direct shear behavior on tire chips using X-ray CT <i>J. Otani, S. Shimada, Y. Tsutsumi, H. Hazarika, Y. Kikushi</i> .....	639
--	-----

## **Soil-Geosynthetic Interaction**

Pull-out behaviour of geosynthetic strip reinforcements in gravel - development of new reinforcement type <i>A. Abdelouhab, D. Dias, N. Freitag</i> .....	645
Dynamic shear testing of a geomembrane/geosynthetic clay liner interface <i>J.D. Ross, P.J. Fox, J. Olsta</i> .....	649
A large-scale ramp model test on GT/GM/GCL liner systems <i>Y.-M. Chen, W.-A. Lin, T.L.T. Zhan, X.-W. Tang</i> .....	653
Geomembrane - fresh concrete interface friction from ramp equipment and field tests <i>M. Abramento, P.M.F. Viana, E.M. Palmeira</i> .....	657
Effect of materials and loading parameters on monotonic and post-cyclic pullout resistance of geogrids <i>K. Fakharian, A. Nayeri</i> .....	661
Investigation of the soil-geosynthetics interface behaviour through a modified direct shear apparatus <i>M. Minno, L. Li, I.H. Ling, Q. Napoleoni</i> .....	665
Effects of wetting on the soil-geogrid interaction <i>C.-W. Chen, J.Y. Wu</i> .....	669
Evaluation of the confining effect on geogrid pullout test under unloading-reloading history <i>G.H. Nguyen, J. Kuwano, J. Izawa, S. Seki</i> .....	675
Pullout resistance of a novel multifunctional geosynthetic in fine grained marginal fills <i>J. Clancy, P.J. Naughton</i> .....	679
The confinement effect of different geogrids <i>N.E. Wrigley, H. Zheng, X.J. Liu, S.R. Sama</i> .....	683
Numerical prediction of the pullout behavior of geosynthetics <i>A.C.C.F. Sieira, L.H.T. Ferreira, D.M.S. Gercovich</i> .....	687
Recent findings about the confining effect of geogrids from large scale laboratory testing <i>A. Ruiken, M. Ziegler, L. Vollmert, I. Duzic</i> .....	691
Time-domain analysis of frictional base isolation using geosynthetics <i>M.G. Arab, E. Kavazanjian Jr.</i> .....	695
FE Analysis implemented with particle discretization for reinforcedstabilized soil with geogrid <i>Y. Miyata, D. Hirakawa</i> .....	699

Mechanical properties of soil-geogrid interface under cyclic loading <i>C. Xu, X.Y. Liao</i> .....	703
Comparisons between internal shear strengths of GCLs by ramp and direct shear tests <i>P.M.F. Viana, E.M. Palmeira, H.N.L. Viana</i> .....	709
The influence of hoop stresses and earth resistance on the reinforcement mechanism of single and multiple geocells <i>A. Emersleben, M. Meyer</i> .....	713
Prestressed geosynthetic reinforced soil by compaction <i>C. Lackner, S. Semprich</i> .....	717
Sandy soil-geogrid interface behavior under changes of water content <i>J. Zhang, N. Yasufuku, K. Omine, T. Kobayashi</i> .....	721
Numerical analysis of the factors that influence geotextile response under pullout condition <i>L.H.T. Ferreira, A.C.C.F. Sieira, D.M.S. Gercovich</i> .....	725
Ramp tests on sand-GCLs interfaces under different moisture and surface conditions <i>H.N.L. Viana, E.M. Palmeira, P.M.F. Viana</i> .....	729
Reflections about interface strength between soils and textured geomembranes <i>D.A.M. Santos, T.S.M.M. Kamiji, R.R. Plácido, J.O. Avesani Neto</i> .....	735
Interaction behaviour of geosynthetics in cohesive soils <i>N. Tamáskovics, H. Klapperich</i> .....	739
Effect of transverse ribs of geogrids on pullout resistance <i>M. Mulabdic, K. Minazek</i> .....	743
Soil liner-geomembrane interface shear strength using rigid substrata or overliner <i>D. Parra, C. Soto, R. Valdivia</i> .....	747

## **Geosynthetic Durability and Long-Term Performance**

Quantification of oxidized bituminous geomembranes ageing through hydraulic testing <i>N. Touze-Foltz, D. Croissant, F. Farcas, P. Royet</i> .....	753
Forensic investigation of geomembrane liner cracking: premature failure or end-of-life? <i>I. Peggs</i> .....	757
Reinforcements made of polyvinyl alcohol yarns: Effect of wet/dry cycles and consequences on the design <i>L.K. Nait-Ali, N. Freitag</i> .....	763
Lifetime prediction of geosynthetics based on high-pressure autoclave tests <i>E. Németh, H. Zanzinger, S.R. Sama</i> .....	769

Combined effect of damage during installation and abrasion on the tensile behaviour of geotextiles <i>M.L. Lopes, M. Pinho-Lopes</i> .....	773
Analytical approach to long-term creep behaviors of geosynthetic reinforcements <i>H.Y. Jeon, H.B. Gong, S.G. Kang</i> .....	777
Effect of damage during installation of woven geotextile on their creep and creep rupture behavior – laboratory tests <i>A.M.V. Paula, M. Pinho-Lopes, M.L. Lopes</i> .....	781
Chemical studies about the durability of polypropylene geotextiles <i>I.M. Valente, J.R. Carneiro, P.J. Almeida, M.L. Lopes</i> .....	785
Creep behavior of geosynthetics using confined-accelerated tests <i>F.A.N. França, B.S. Bueno</i> .....	789
The strange effect of increasing temperature in accelerated ageing of HDPE geomembranes immersed in liquids <i>R.K. Rowe, F.B. Abdelaal, M.Z. Islam, Y.G. Hsuan</i> .....	793
Effects of two different carbon black on the depletion of antioxidants in HDPE geosynthetics <i>W.K. Wong, Y.G. Hsuan</i> .....	799
Case history of a 20-year old exposed HDPE surface impoundment liner <i>M.A. Yako, G.R. Koerner, R.M. Koerner, Y.G. Hsuan</i> .....	805
Evaluation of physical properties of aged geomembranes taken from landfill sites in Japan <i>T. Shimaoka, H. Nakayama, T. Hirai, J. Hironaka, T. Katsumi, S. Ueda, H. Kanou</i> .....	809
Variability in curve shifting when applying the Stepped Isothermal Method <i>C. Lechat, J. Greenwood</i> .....	813
High-temperature durability tests on HDPE geomembrane and ethanol byproducts <i>W. Rizzoli, M. Abramento</i> .....	817
UV degradation of hdpe and pvc geomembranes in laboratory exposure <i>P.C. Lodi, B.S. Bueno, J.G. Zornberg</i> .....	821
Durability of geosynthetic liners in high pH environments <i>F. Gassner, J. Scheirs</i> .....	825
Effect of natural weathering on the water permeability behaviour of nonwoven polypropylene geotextiles <i>S.P. Moreira, J.R. Carneiro, M.L. Lopes</i> .....	829
Objectification suggestion for installation damage evaluation of geosynthetics <i>H.Y. Jeon, J.J. Yuu, J. Han</i> .....	833
Ageing of high performance polymers used in civil engineering: polyester and aramid geotextiles <i>L.V. van Schoors, G. Derombise, S. Lavaud, D. Duragrin, N. Barberis, T. Chaussadent, P. Davis</i> .....	839

Tearing strength tests in geotextiles to contribute in the evaluation of its durability in sulphurous groundwater environment <i>L.M.F. Gomes, F.R. Santos, M.F. Nunes</i> .....	843
Permeation properties of HDPE geomembranes <i>D.S.D. Pereira, P.C. Lodi</i> .....	847
Method of evaluating the durability of geomembrane in landfill <i>J. Hironaka, T. Hirai, T. Shimaoka, H. Nakayama, T. Katsumi, S. Ueda, H. Kanou</i> .....	851
Tensile Creep Behavior of a PVC Coated Polyester Geogrid at Different Temperatures <i>C. Hsieh, B.-F. Chuang, Y.-C. Tseng</i> .....	855
Geotextiles long term durability – product design parameters <i>A.D. Leech</i> .....	861
Influence of damage during installation on the hydraulic behaviour of geotextiles <i>M. Pinho-Lopes, M.L. Lopes</i> .....	865
Natural and artificial weathering of polyethylene geonets <i>J.R. Carneiro, P.J. Almeida, M.L. Lopes</i> .....	869
Experimental study and prediction on the long-term creep properties for geogrids at different temperatures <i>J. Tong, B. Gong, J. Liu</i> .....	873
Field and laboratory based studies on the hydrolysis of polyester fibres <i>P.J. Naughton, G.T Kempton, H. Özçelik, R. Lozano, M. Scotto</i> .....	877
Mechanical behavior of a PVC geosynthetic barrier exhumed from an industrial waste disposal trench <i>P.S. Hemsí, D.M. Vidal, C. Fonseca, P. Yoshimura, D.C. Urashima</i> .....	881
Effect of damage during installation on the pullout behaviour of geosynthetics <i>L.M.A. Araújo, A.M.V. Paula, M. Pinho-Lopes, M.L. Lopes</i> .....	887
Short-term mechanical behaviour of geotextiles after laboratory DDI tests <i>C. Rosário, M. Pinho-Lopes, M.L. Lopes</i> .....	891
Characterising long-term UV stabilization of geomembranes under different environmental conditions <i>R. Baleki, B. Sanders, T. Steele, J. Eng, G. Vitarelli</i> .....	895
Characteristics of geosynthetics used in the waterponds in Spain <i>P. Abad, M. Blanco, A. Leiro</i> .....	899
<b>Geosynthetics in Environmental Applications</b>	
Equivalency of landfill liner designs, including clay liners, geosynthetics liners and polymer-enhanced mineral barriers, under French legislation <i>A. El-Zein, N. Touze-Foltz</i> .....	905

Influence of landfill cap cover characteristics on the mitigation of GHG emissions <i>M. Staub, J.-P. Gourc, R. Simonin</i> .....	909
Installation techniques of geosynthetic barriers into the coastal landfills <i>N. Kotake, M. Ishida, T. Katsumi</i> .....	915
Influence of the type of bentonite of GCLs on the transmissivity at GCL-geomembrane interfaces <i>M.J.A. Mendes, N. Touze-Foltz, E.M. Palmeira, P. Pierson</i> .....	919
Drainage geocomposites: a considerable potential for the reduction of greenhouse gas emission <i>Y. Durkheim, S. Fourmont</i> .....	923
Design and construction of the Bena Sanitary Landfill, Kern County, California, U.S.A. <i>S. Purdy, K.P. Sinha</i> .....	927
Geocomposite capillary barrier for groundwater suppression at Lyon County landfill cell and bond construction <i>M. Evans, A. Zhao, L. Salzer</i> .....	933
Experimental study of the gas permeability of GCLs: influences of the type of material and the water content <i>P. Pierson, M.J.A. Mendes, E.M. Palmeira, H.N. Pitanga, O.M. Vilar</i> .....	939
Performance of nonwoven geotextiles as protective layers for HDPE and PVC geomembranes <i>R.E. Geroto, O.M. Vilar</i> .....	943
Evaluation of leakage behavior through defected geomembranes using X-ray CT and numerical analysis <i>T. Mukunoki, K. Nagata, J. Otani, M. Shigetoku</i> .....	947
Laboratory studies on geotextiles tube dewatering by pressure filtration test in reduced model <i>D.C. Urashima, E.A. Guanaes, M.G.A. Guimarães, P.P. Pontes, D. Vidal</i> .....	951
The use of geotubes for the disposal of contaminated dredged material from from southern dock of Buenos Aires City Port <i>S.A. Reyes, V.R. Morato, A. Juanpataoro, M.R. Darqui, R.D. Hughes</i> .....	955
Effect of the waste pressure on fluid migration through geomembrane defects <i>M.C.P. Barroso, M.G.D.A. Lopes, G. Bergamini</i> .....	959
Optimization of anchor trench design for solar evaporation ponds <i>R. Thiel</i> .....	963
GCLs against acid drainage from excavated rocks discharged through construction works <i>T. Katsumi, T. Inui, H. Mogami, A. Dejima, M. Kamon</i> .....	967
Erosion control test plot in steep slopes at an amazonic rainforest highway <i>A. Mansen, K. Lundberg, J. Cardozo, G. Fierro, B. Barrera, S. Nakamatsu, R. Schmalbach, D. Senf</i> ...	971

Geosynthetics application for low-radioactive waste storages <i>V.G. Ofrikhter</i> .....	975
Integral solution for Dos Bocas PEMEX marine facilities beach erosion problem at Tabasco, Mexico <i>A. Solis, A. Wang, A. Tang</i> .....	979
Evaluation of performance of double composite landfill liner <i>T.B. Nguyen, H. Choi, T. Stark</i> .....	983
Use of reinforced geomat in steep slopes <i>V.G. Chiari, P.J. Santos Junior, L.L. Lima, J. da Silva Duran, P.C.B. Ferretti</i> .....	987
Dewatering system with linear geofoms on the ETE - Uberabinha – DMAE - MG sewage treatment plant <i>J.C. Vertematti, A. Silva</i> .....	991
Installation of geosynthetics on an industrial dangerous waste landfill <i>P.M. Sobral, L.F. Cascão</i> .....	995
Use of geogrid as a resistive layer for landfill cover: centrifuge study <i>S. Rajesh, B.V.S. Viswanadham</i> .....	999
Difficulties associated with the specification of protection geotextiles using only unit weight <i>A.J. Warwick</i> .....	1003
Thermo-graph inspection for geomembrane seam evaluation <i>H. Nakayama, T. Shimaoka, S. Ueda, K. Aoyama</i> .....	1009
Experimental characterization of waste and geotechnical design aspects of the Enna (Italy) landfill <i>M. Maugeri, F. Castelli, G. Mancini, G. Biondi</i> .....	1013
Design and construction of waste lime landfill construction <i>E.C. Shin, J.K. Kang, G.H. Kim</i> .....	1017
Realization of the capping of Vergiate landfill in Italia <i>P. Gendrin, P. Gervasini, P. Lefèvre, P. Ravalchini</i> .....	1021
Field test to assess the influence of a geomembrane liner in a landfill on soft clays <i>N.P. Parra-Piedrahita, E. Ovando-Shelley, M.C. Cabrera-Velázquez, M. Trigo-Lara, R. Contreras</i> ..	1025
Metallic mesh with geosynthetic retention strips for slope protection against superficial erosion <i>G.C. Costa, D.C. Urashima, G.F. Marques, D. Vidal, A.E.F. da Silva</i> .....	1029
Hydraulic conductivity and chemical performance of Brazilian geosyn-thetic clay liner (GCL) using KCl and CuCl <sub>2</sub> 2H <sub>2</sub> O solutions <i>M. Musso, O.J. Pejon</i> .....	1035
Application of geosynthetics in low level radioactive waste disposal facilities <i>A. Rawat, R.R. Rakesh, J.N. Mandal</i> .....	1039

Structural, bio-engineered, vegetated rock face protection <i>R. Schmalbach, D.F. Senf, J. Cardozo, G. Fierro, S. Nakamatsu</i> .....	1045
Lining of industrial water reservoir with HDPE geomembrane <i>R. Dash, M. Venkataraman</i> .....	1049
Environmental closures using a composite of textured membranes with drainage studs and synthetic turf <i>M.R. Ayers, J.L. Urrutia</i> .....	1053
Leach pad design and construction issues in very steep slopes <i>S. Currie, D. Parra</i> .....	1057
In-service structural performance of landfill lining components: instrumentation of a side slope lining system <i>K.A. Zamara, N. Dixon, G.J. Fowmes</i> .....	1061
 <b>Geosynthetics in Mining Applications</b>	
Designing geomembrane capping layer for long term performance: A case study of closure of tailings storage facility in BHPBilliton Worsley Alumina <i>I.D. Peggs, N. Amoah, J. Philips</i> .....	1069
The behaviour of non-woven geotextiles in tailings dams drainage systems <i>G.S. Araújo, M.G. Gardoni, R.C. Gomes</i> .....	1075
Geomembrane containers for storage of liquids <i>J.W. Cowland, M.A. Sadlier</i> .....	1079
Earth dam project using structural geogrids for tailings pond <i>M. de la Torre, B. Torreblanca</i> .....	1083
Design considerations regarding the interface shear strength of geomembrane liners in mining applications <i>J.F. Lupo</i> .....	1087
The use of geomembranes in Chilean mining industry <i>A.L. Rollin, M. Marcotte, S. Lapointe, C. Charpentier</i> .....	1091
Engineering judgment in applying geotechnical solutions for primary crusher tip wall in mining operations: Case studies <i>J.F. Meadows, H. Özçelik</i> .....	1095
Laboratory study on the performance of geosynthetics drainage systems in contact with ore from Carajás mining <i>M.G.A. Gardoni, L.F.S. Villar, J.C. Ferreira, M.C. Monteiro</i> .....	1099
Retaining Earth Wall for loading and access platform for heavy mining trucks <i>N. Berrospid Aguilar, J.C. Rivera Baca</i> .....	1103

Impact of geomembrane liners on the design and construction of tailings dams <i>A.J. Brietenbach</i> .....	1107
Feasibility studies for phosphate fine tailings disposal in geotextile tubes <i>R.J. Bittar, R.C. Gomes, L.C.Q.C. Melo, P.M. Martins</i> .....	1111

## Volume 3 - Table of Contents

### Drainage and Filtration

Method for direct measurements of the long-term water flow capacity of drainage geocomposites under soft bedding conditions <i>H. Zanzinger, S.R. Sama, A. Dobrat</i> .....	1117
Effect of sustained loading on structural stability of biplanar geonets <i>D. Narejo, S. Allen</i> .....	1121
Case study – clogging of a geotextile/geopipe system in a landfill drainage application <i>I.R. Fleming, F.S. Barone, P.J. Dewaele</i> .....	1127
Assessment of the resistance of drain tube drainage geocomposites to high compressive loads <i>P. Saunier, W. Ragen, E. Blond</i> .....	1131
Permittivity of geotextiles with biaxial tensile loads <i>M. Edwards, G. Hsuan</i> .....	1135
Development of a new filtration testing apparatus involving mechanical stresses <i>T. Daqoune, E. Blond</i> .....	1141
Experimental study of clogging in drainage systems <i>J.L. Vieira, M. Abramento, M.V.W. Campos</i> .....	1145
Composite filters for critical applications <i>G.M. James, K.R. Legge, I. Nyirenda</i> .....	1149
Drainage geocomposite to underground concrete structures <i>M. Balbin Ruiz, N. Berrospid Aguilar</i> .....	1157
Evaluation of transmissivity characteristics of some geosynthetics under normal stress <i>D.V. Raisinghani, S. Khan, B.V.S. Viswanadham</i> .....	1159
Romanian geotextiles behaviour at drainage, reinforcement and slopes protection works <i>A. Barariu, L. Talos, A. Chirica</i> .....	1163
Retention analysis of nonwoven geotextile filters during filtration of suspended solids <i>D.C. Urashima, D. Vidal</i> .....	1167

Effect of geometry of different types of geosynthetics for drainage <i>S.-S. Yeo, Y.G. Hsuan</i> .....	1171
Influence of load type on filtration behaviour for two nonwoven geotextile-soil composites <i>C.S. Wu, Y.S. Hong, H.H. Yang, W.F. Lee</i> .....	1175
Design of a geosynthetic drainage system for soil-cement slope protection subjected to drawdown conditions <i>C. T. Weber, D.J. Montgomery, T.E. Arnold</i> .....	1181

## Hydraulic Applications

Experimental study on turbulent flow and wet sieving tests after abrasion load of geotextiles <i>M. Maisner, M. Heibaum</i> .....	1187
Mountain reservoirs with geomembrane lining systems in France: behaviour, pathology, guidelines and outstanding projects <i>H. Girard, F. Delorme, L. Deroo, L. Peyras, P. Meriaux, G. Degoutte, M. Lefranc</i> .....	1191
Tests on geosynthetics used in waterways <i>M. Heibaum</i> .....	1197
An approach for the design and installation of geomembranes on the upstream face of rockfill dams <i>J. Colmanetti, A.P. Assis, E.M. Palmeira</i> .....	1201
Large drinking water storages with PVC geomembrane and floating cover. Experience and long term performance in Corsica <i>D. Fayoux, P.F. Benedetti, G. Potié</i> .....	1207
A qualitative improvement of river dykes with breathable and waterproof fabrics <i>T. Masuo, T. Mukunoki, K. Hino, M. Ishida, K. Hara</i> .....	1213
Revisiting the geotextile tubes at Incheon Bridge Project, Korea <i>T.W. Yee, J.C. Choi, E. Zengerink</i> .....	1217
Large scale physical model tests on sand filled geotextile tubes and containers <i>P. Van Steeg, A. Bezuijen</i> .....	1221
Evaluation of the retention of slurry sediments using geotubes <i>M.M. Khachan, J.L. Smith, M.D. Grzelak, S.K. Bhatia</i> .....	1225
The application of geocell gravel structure in cold regions canal slope protection <i>X.M. Qu, B. Zhang, E.L. Wang</i> .....	1231
Submerged barrier for coastal protection application built with tubes in geosynthetics of big diameter in Tuscany – Italy <i>P.L. Aminti, E. Mori, P. Fantini</i> .....	1235

State of the art report - geotextiles in waterfront applications <i>D.A. Gaffney, W. Voskamp, E. Berendsen</i> .....	1241
Interpretation of clogging effects on the hydraulic behavior of ion treated geotextiles <i>K.W. Lee, H.Y. Jeon, J. Zornberg</i> .....	1245
Physical and numerical modeling of infiltration in sand-geotextile systems <i>G.A. Siemens, R.J. Bathurst</i> .....	1251
Evaluation of permeability and mechanical property of permeable column material <i>S. Kobayashi, K. Miura, T. Konami, N. Otsuka, H. Yamazaki</i> .....	1255
Reuse of by-products as geo-materials in port construction in Japan <i>Y. Kikuchi</i> .....	1261
Technology of geomembrane on earth-rock dam for seepage prevention <i>Y.M. Shu, Q.Y. Yuan, Q. Chen, Y.L. Li, H.M. Wu</i> .....	1265
Experimental studies and analysis of stress condition of silty sand embankment reinforced with geotextile <i>S.C. Pan, Q.L. He, X.G. Jiang</i> .....	1269
Research and demonstration of application the geosynthetics to the canal revetment protection engineering in seasonal frozen soil region <i>B. Zhang, A.L. Yuan, W.Q. Yue, L. Qu</i> .....	1273
Large geotextile containers for coastal storm protection <i>M. Sadlier, S. Restall, P. Hacong, P.T. Quan</i> .....	1277
Canals waterproofing with PVC geomembranes – Portuguese experience <i>L.C. Pacheco, A.L. Gonçalves, J.L. Catalão</i> .....	1281
Protection of San Luis de Palenque City – Casanare Department Colombia <i>L. Castro</i> .....	1285
Coastal protection of Figueira da Foz Dune <i>R.V. Correia, L.F. Cascão</i> .....	1289
Geosynthetics in maritime and hydraulics structures - Case histories in India <i>M. Venkataraman, S. Murugesan</i> .....	1293
Refinery oil sludge dewatering with geotextile tubes <i>A. Auerbach, L. Sheizaf</i> .....	1297
Development and application of geomat for flood defense <i>Y. Jun, H. Guoqing, H. Yonghui</i> .....	1301
Application and research for geo-synthetics in Yellow River emergency rescue <i>X. Li, X. Meng, L. Sun</i> .....	1305

Dewatering of contaminated materials with high moisture content in a short period of time using geotextile tubes in Camaçari, Brazil <i>L.G.B. Escobar, J.A.M. Ribeiro, N.P.B. Castro, L.C.Q. Melo</i> .....	1309
---	------

## **Innovative Geosynthetic Products and Applications**

Case History - Deflection of structures reinforced with materials of different stiffness <i>C.J.F.P. Jones</i> .....	1315
Pull-out behavior of a draining geogrids embedded in waste cohesive materials <i>V.N. Ghionna, P. Parla, M. Scotto, S. Veggi</i> .....	1319
Geosynthetics for the protection of buried pressurised pipes against mechanical damages caused by excavating tools <i>H.K.P.A. Andrade, E.M. Palmeira</i> .....	1323
Field verification test for buried bend with lightweight thrust restraint using geogrid <i>T. Kawabata, A. Izumi, A. Kashiwagi, T. Hanazawa, S. Okuno, M. Suzuki, Y. Sawada</i> .....	1327
Recycling domestic plastic mesh bags for soil reinforcement <i>C.A. Canova, M.I.M. Pinto, I.M.C.F.G. Falorca, M.T.F. Vieira</i> .....	1333
Long-term instrumented field test using geofoam to reduce earth loads on buried concrete pipe <i>J. Vaslestad, G.Y. Yesuf, T.W. Johansen</i> .....	1337
Novel geocomposite liner system for the irrigation channels and waterways <i>R. Hanna, B. Bennet, J. Scheirs</i> .....	1345
Three dimensional geosynthetics as cushion for load reduction - Field trial and numerical simulation <i>H. Hazarika, K. Kaneda, Y. Mae, N. Mikami</i> .....	1351
Case history of a noise barrier in Almere, Netherlands <i>I. Duzik</i> .....	1355
Upgrading of existing stone guard fence by use of high-energy absorption net <i>A. Yashima, T. Hara, S. Tsuji, K. Sawada, M. Yoshida</i> .....	1359
Application of reinforced soil wall having self monitoring system to actual embankment construction project <i>K. Yoshida, N. Tatta, Y. Yokota, S. Tsuji, H. Ohta</i> .....	1363
The properties and performance of planar geogrids with integral junctions and ribs in three directions <i>A. McGown, S.F. Brown, N. Thom, A. Chen</i> .....	1367
Laboratory study of geotextile encased sand columns <i>G.L.S. Araújo, E.M. Palmeira</i> .....	1371

Coir geotextile for slope stabilization and cultivation – a case study in a highland region of Kerala, South India <i>S. Vishnudas, K.R. Anil, H.H.G. Savenije, P. van der Zaag</i> .....	1375
The use of geocomposite as compressible layer to reduce vertical stress on buried structures <i>R.R. Placido, B.S. Bueno</i> .....	1379
Subgrade stabilization using lattice-frame-reinforced sheet accompanied by compacted crushed-stone layer <i>T. Yoshida, Y. Kitamoto, M. Okamoto, T. Kawanaka, A. Okamura</i> .....	1383
Electro-osmotic consolidation of soft tropical clay in laboratory trial <i>A.J.P. Nascimento, P.S.N. Murrieta</i> .....	1387
Properties of ethylene vinyl alcohol and value for select geomembrane applications <i>R. Armstrong, E. Chow</i> .....	1391
A significance of L-shaped geosynthetic drain (LGD) against seepage flow <i>K. Hara, S. Shibuya, M. Saito, N. Torii, J. Chae, T. Masuo</i> .....	1397
Assessment of a consolidation model issued to geotextile-encased columns based on field instrumentation data <i>C.T. Santos, P.I.B. Queiroz, D. Alexiew</i> .....	1403
Filtration and permeability of wick-drain jackets in short and long term performances <i>J.D. Guimarães-Filho</i> .....	1409
Effects of geogrids on compaction of granular materials made from recycled glass bottles in back-filling works <i>T. Mikami, J. Koseki, T. Sato, C. Yajima</i> .....	1413
Deformation characteristics of rubber sphere aggregates and sand-tire chips mixtures in triaxial compression condition <i>Y. Kikushi, T. Sato, H. Hazarika, T. Hidaka</i> .....	1417
Research on deformation law of geogrid-reinforced expansive rock due to moisture absorption <i>J. Ding, W. Zhou, J. Liu</i> .....	1421
Development of new connection systems between facing block and geogrid <i>K.W. Lee, S.D. Cho, J.H. Han, K.K. Hong, H.J. Moon</i> .....	1427
Application of reinforcing techniques on soft ground using geosynthetics and bamboo-net in Korea <i>K.-S. Yang, T.-G. Han, S.-D. Cho, S.-K. You</i> .....	1431
Experimental study of light soil heat preservation effect in freeze-thaw cycling <i>G.Y. Liu, H. Zhong, B. Zhang, E.L. Wang, J.L. Sun</i> .....	1435

## **Geosynthetics in Highways and Railways**

Comparison of bearing capacity on geocell-reinforced subgrade <i>E.C. Shin, S.H. Kim, Y.I. Oh</i> .....	1441
--	------

Evaluation of geosynthetic-reinforced flexible pavements using static plate load tests <i>J.S. McCartney, B.R. Cox, C.M. Wood, B. Curry</i> .....	1445
Performance of geogrids overlying geotextiles in roadway stabilization applications <i>B.R. Christopher, L.G. Schwarz</i> .....	1451
Geosynthetic reinforced unpaved road performance after surface maintenance <i>E.M. Palmeira, L.G.S. Antunes</i> .....	1457
Monitoring of a railway piled embankment <i>P.G. Duijnen, S. J.M. van Eekelen, A.E.C. van der Stoel</i> .....	1461
Improvement of the long-term trafficability of harbour container terminals with composite geogrid reinforcement <i>G. Heerten, J. Klomp maker, C. Lesny</i> .....	1465
Effect of field condition parameters on the performance of geosynthetic-based interlayer systems used to control reflective cracking in hot-mix asphalt overlays <i>J. Baek, I.L. Al-Qadi, W.G. Buttlar, J. Vespa</i> .....	1473
Laboratory drop weight impact tests on geogrid reinforced pavements <i>A.H.W. Tan, S.H. Chew, Z.W. He</i> .....	1477
Field performance of geosynthetic reinforced pavements over expansive clay subgrades <i>J.G. Zornberg, R. Gupta, J.A.Z. Ferreira</i> .....	1481
Reinforcement and separation with woven geotextiles, for the Iquitos-Nauta roadway, Loreto - Perú <i>N.A. Sifuentes</i> .....	1485
Colombian experience in use of fiberglass geogrids as a reinforcement alternative for flexible and concrete pavements <i>J.J. Martínez</i> .....	1491
Lifetime extension of reconstructed asphalt pavements by using geosynthetic interlayers: effectiveness of an innovative combined system <i>M. Tazl, N. Meyer</i> .....	1495
Evaluation tests of ballasted track reinforced with geosynthetic bags <i>T. Kachi, M. Kobayashi, M. Seki, J. Koseki</i> .....	1499
Effect of infill material on the performance of geocell-reinforced bases <i>J. Han, S.K. Pokharel, R.L. Parsons, D. Leshchinsky, I. Halahmi</i> .....	1503
Construction of the bridge approach embankments for Riga's South Bridge: Case study <i>A. Herold, H. Hangen</i> .....	1507
The influence of soil and type of geosynthetics on the bearing capacity of roads <i>S. Vogt, G. Bräu, U. Blume</i> .....	1515

Repaving principal highways in Caracas-Venezuela using non-woven, needle punched, and impregnated with asphalt emulsion geotextiles <i>A. del Castillo</i> .....	1521
Technology of repaving the freeway to Santa Ana using nonwoven paving geotextile (El Salvador, Central America) <i>M.P. Guerra Escobar</i> .....	1525
Evaluation of an airport pavement after almost 8 years of overlay rehabilitation with a polyester geogrid asphalt reinforcement <i>C.A. Monser, G.E. Montestruque, A.E.F. Silva</i> .....	1529
Innovative geocomposite materials – large-scale laboratory and field test results <i>G. Heerten, J. Klompmaker, C. Lesny</i> .....	1535
The performance of road aggregate reinforced with geogrid found from repeated load triaxial and dynamic plate bearing tests <i>G. Stevens, G. Arnold</i> .....	1543
Behavior of triangular aperture geogrid-reinforced bases under static loading <i>Y.L. Dong, J. Han, Y. Qian, X.H. Bai</i> .....	1547
Physical model test of reinforced flexible pavement <i>V. Kunakulsawat, K. Punthutaecha, S. Youwai, W. Kongkitkul, P. Jongpradist, H. Maneetes</i> .....	1551
Multi-layer geosynthetic-reinforced embankment over potential sinkholes for a Rapid Rail Link in South Africa <i>M.B. Jaros, G.M. James, C. Gewanlal</i> .....	1555
Geosynthetics applied to base reinforcement – TBR and LCR parameters evaluation from a real field condition experiment <i>C.J. Ferreira, D. Vidal</i> .....	1561
Jute geotextile for controlling railway track settlement – a case study <i>P.K. Choudhury, T. Sanyal</i> .....	1565
Geotextile prospects in Pakistan <i>S.F. Jamil</i> .....	1569
Use of geosynthetics for the strengthening of road pavement structure in Lithuania <i>A. Vaitkus, D. Cygas, A. Laurinavicius</i> .....	1575
The effects of geogrid on reduction of reflection cracking in asphalt overlay <i>Sh. Fallah, A. Khodaii, F.M. Nejad</i> .....	1581
Ten years of experience in geosynthetics applications in Croatian road construction <i>S. Bajtl, D. Mrackovski, P. Velicki</i> .....	1589
Recent geosynthetics road applications in Northern Africa: data base initialization <i>A. Bouazza, J.P. Gourc</i> .....	1593

# Volume 4 – Table of Contents

## Reinforced Walls and Steep Slopes

Influence of facing type and external loads on the behavior of geogrid reinforced soil walls <i>V.C.P. Guedes, M. Ehrlich</i> .....	1601
Post-construction tensile load and strain behaviour of geogrids arranged in full-scale high walls <i>W. Kongkitkul, F. Tatsuoka, D. Hirakawa, T. Sugimoto, S. Kawahata, M. Ito</i> .....	1605
Seismic reinforcement method at crest of road embankment by geosynthetics <i>N. Tatta, J. Jang, K. Tokida, K. Oda, A. Nakahira</i> .....	1611
Prediction of tension in the reinforcement in a full scale block-faced geogrid reinforced soil wall using fine-grained tropical soil as backfill <i>M.V.F. Riccio, M. Ehrlich</i> .....	1619
Base and slope reinforcement of very tall reinforced embankments for the A1 highway in Italy <i>P. Rimoldi, F. Talone</i> .....	1623
Reinforced very steep wall 23 meters high built on a river bank in an industrial settlement in Lumezzane (Italy) <i>S. Spadini, M. Piazza, P. Fantini, L.E. Russo</i> .....	1629
“Green” reinforced soil walls using geosynthetics: an alternative for ecological and environmental projects <i>M.P. Guerra Escobar</i> .....	1633
Evaluation for damage of geogrid reinforced soil walls subjected to earthquakes <i>J. Izawa, J. Kuwano</i> .....	1639
Case study – reinforced soil systems employed on the project Hobsonville state highway deviation in Auckland, New Zealand <i>J. Kupec, J.O. Owusu</i> .....	1643
Failure analysis and rehabilitation of distressed reinforced soil wall on Delhi – Jaipur Toll Road, India using soil nailing technique <i>S. Biswas, A. Adhikari, D. Chauhan</i> .....	1649
Redevelopment of a former Quarry, Nuneaton, UK: Incorporating the design, construction, monitoring and serviceability a 35m high geosynthetic reinforced slope <i>P. Thurlwell, G.J. Horgan, M. Ball</i> .....	1655
Development of a new bridge type, GRS integral bridge <i>F. Tatsuoka, H. Nishikiori, R. Soma, D. Hirakawa, T. Kiyota, M. Tateyama, K. Watanabe</i> .....	1659
Numerical parametric study of geofoam seismic buffers with different constitutive models <i>S. Zarnani, R.J. Bathurst</i> .....	1665

Effects of negative pore air pressure in backfill soil on seismic behavior of geosynthetic-reinforced soil and conventional type retaining walls <i>J. Koseki, K. Hong, S. Mulmi, S. Nakajima, K. Watanabe, M. Tateyama</i> .....	1671
Confined and reinforced sand retaining walls resisted VIII Grade seismic MM intensity <i>J. Alva-Hurtado, J. Cardozo, G. Fierro</i> .....	1675
Effect of internal drainage on performance of reinforced earth wall during rainfall <i>C. Yoo</i> .....	1677
Twenty eight meters high geogrid reinforced embankments as flexible solutions in problematic hill-sides: Project Trieben-Sunk, Austria <i>D. Alexiew, K. Lackner, O. Detert, D. Brokemper, C. Lackner</i> .....	1681
Behavior of a geogrid reinforced soil wall built with clayey silt <i>A.S.J.F. Sayão, L.B. Becker, A.L.L.S. Nunes, , L.M. Costa Filho</i> .....	1685
Reinforced soils walls for platforms of the interoceanic roadway Peru-Brasil <i>H. Egoavil Perea, N. Berrospid Aguilar, W. Villagomez</i> .....	1689
Behavior of cellular reinforced soil wall under uniformly distributed load <i>M.S. Khedkar, J.N. Mandal</i> .....	1693
Parametric study of a reinforced highway slope in Thailand <i>M. Dechasakulsom, J. Sukolrat, G. Pensomboon</i> .....	1699
Numerical analysis of effective hybrid sandwiched reinforcement for cohesive soils <i>S. Yamazaki, K. Yasuhara, H. Komine, S. Murakami, H. Mouri, H. Mohri, T. Hori</i> .....	1703
Post-construction behaviour of two high geogrid-reinforced soil retaining walls for Fujisan-Shizuoka airport <i>T. Sugimoto, S. Kawahata, T. Yoshida, M Itoh, F. Tatsuoaka</i> .....	1709
Analysis and design of reinforced embankments: methodology, implementation and impact of critical parameters <i>N.S. Klimis, Ch.F. Efremidis, D.E. Argyriadi, E.M. Comodromos</i> .....	1715
Construction and Monitoring of a 22.5 m high Geosynthetic Reinforced Segmental Retaining Wall in India <i>K. Rajagopal, M.R. Madhav, P.T. Raju, V. Sreedhar, K.H. Loke</i> .....	1719
Geofiber reinforced slopes subjected to seepage: Centrifuge study <i>A. Das, B.V.S. Viswanadham</i> .....	1723
Development of a procedure to evaluate earthquake induced residual displacements of geosynthetic reinforced soil retaining walls <i>S. Nakajima, J. Koseki, K. Watanabe, M. Tateyama</i> .....	1727
Geogrid wall construction using blast furnace slag on a failing slope <i>G. Baykal, T. Engin</i> .....	1731

Reinforced steep slope design for a building area in Matera (Italy) <i>G.P. Pinzani, A. Paolicelli</i> .....	1735
Design and construction of a new type of transportable system for reinforced soil walls <i>A. Garrard</i> .....	1739
Research on load test of reinforced retaining wall suffered freezeing and thawing cycle <i>E.L. Wang, Y.X. Jie, L. Qu, J.D. Chang, H. Zhong</i> .....	1745
Effects of earthquake characteristics on the seismic response of geosynthetic-reinforced soil walls <i>H. Liu</i> .....	1749
Geogrid-reinforced structures in China subjected to seismic events <i>Z.J. Dai, N.E. Wrigley, M.F. Chen, L.L. Chen</i> .....	1753
Reinforced trapezoidal embankment for the protection of a road against an active landslide from the side of a quarry <i>L.E. Russo, M. Balducci, P. Fantini</i> .....	1757
Restoration and investigation of road embankment damaged by the large-scale earthquake <i>T. Kubo, T. Nishimoto, K. Yoshida, N. Tatta, S. Tsuji</i> .....	1761
Two major geogrid reinforced rockfall barriers in northern Italy <i>M. Broccolato, V. Segor, P. Recalcati, S. Salis</i> .....	1765
Construction of a full-scale wrapped face geogrid reinforced wall using recycled construction and demolition waste as backfill material <i>E.C.G. Santos, E.M. Palmeira, R.J. Bathurst</i> .....	1769
Segmental retaining wall: comparison between predicted and observed slip surface <i>M.F. Benessiuti, G.P. Bernardes, E.J. Ananias</i> .....	1773
Slope stabilization with woven geogrids in San Bernardo Hill <i>P.A. Porri, F.R. Rivelli, D.T. Benedetti</i> .....	1777
A case study on the construction of reinforced earth wall using I-type connection system <i>J.G. Han, K.K. Hong, K.W. Lee, S.D. Cho, H.J. Moon</i> .....	1781
Model test and numerical analysis of active earth pressure against concrete block retaining wall <i>K. Arai, H. Machihara, L. Lu, S. Tsuji</i> .....	1785
Execution examples of construction method for geotextile-reinforced soil wall in combination with expanded-beads mixed light-weight soil <i>M. Furuichi, Y. Ueda, J. Hironaka, A. Shirai, Y. Ebihara</i> .....	1791
The construction of geosynthetic-reinforced soil (GRS) integral bridge <i>T. Nonaka, Y. Kitamoto, M. Kurisu, A. Ogawa</i> .....	1795
Execution and field measurements of a 12 m high reinforced and lime stabilized noise protection wall <i>L. Vollmert, D. Urbanski, C. Recker, H. Ehrenberg</i> .....	1801

Reinforced soil walls with full height facing panels – an Indian case history <i>M. Sudhakar</i> .....	1807
Influence of soil gradation and facing type on the failure of a segmental retaining wall <i>A. Haddad, M.H. Azizi</i> .....	1811
Behavior of strip footing on sand slope reinforced with orthogonally H-V inclusions <i>S. Zhang, M. Zhang, G. Tan</i> .....	1815
Design software comparison of reinforced steep slopes <i>B. Fonyo, A. Sacchetti</i> .....	1819
Geogrid - reinforced embankments for landslides stabilization and failures rehabilitation <i>A. Kollios, M. Migirou</i> .....	1823
External stability of geogrid reinforced-soil segmental bridge abutments under seismic excitation <i>I.H. Attar, K. Fakharian</i> .....	1827
Shaking table tests on seismic performance of geogrid reinforced slag wall <i>A. Edinçliler</i> .....	1831
Design of reinforced embankments: limit equilibrium and numerical methods <i>E.M. Comodromos, M.C. Papadopoulou, N.S. Klimis</i> .....	1835
Steep sloped reinforced soil embankments under repeated loading <i>N. Unnikrishnan, K. Rajagopal</i> .....	1839

## **Embankments on Soft Soils**

Application of prefabricated vertical drain (PVD) combined with vacuum and heat preloading for soft Bangkok clay improvement <i>D.T. Bergado, J. Saowapakpiboon, J.C. Chai, Y.M. Thann, P. Voottipruex</i> .....	1845
Two reinforced embankments on soft soils: Experience after more than twenty years <i>D. Alexiew, K.-H. Blume</i> .....	1851
Study of the behavior of a reinforced embankment supported on alluvial soil typical of the sedimentary basin of São Paulo, Brazil <i>G.V. Moretti, J.A. Paschoalin Filho, C.V.S. Benjamim, A.O. Moretti</i> .....	1855
Case Study: Carpark on peat - Combined construction techniques using geosynthetics and results of field measurements <i>J. Thiele, M. Iken, L. Vollmert</i> .....	1859
Centrifuge modeling of reinforced and unreinforced embankments with lime-stabilized fill on soft ground <i>J.F. Chen, S.B. Yu, Z.M. Shi</i> .....	1865
Development and performance of load cell systems for reinforced embankment and reinforced soil wall <i>M.S.S. Almeida, M. Ehrlich, M. Riccio, H.O. Magnani, H. Souza</i> .....	1869

Settlement performance of soft clays using prefabricated vertical geodrains with varying diameter <i>M.V. Shah, A.V. Shroff, N.H. Joshi</i> .....	1875
Evaluation of 3-D load transfer effect on deep mixing method combined with earth reinforcement technology <i>Y. Watanabe, J. Otani, K. Fujimoto, J. Hironaka, T. Hirai</i> .....	1879
Deformation calculation of under-consolidated deposit induced by vacuum consolidation <i>J.-C. Chai, T. Hino, N. Miura</i> .....	1883
Longtime-behavior of big rail yard embankment on soft ground <i>K. Kojima, T. Matsumaru, T. Yonezawa, O. Maruyama, K. Kariyazaki</i> .....	1887
Heavy preloading and consolidation of soft soil masses with the use of reinforced embankment and vertical drains <i>J. Sobolewski, V. Radovanovic</i> .....	1893
The use of geosynthetics in a sea port reclaimed area in Southern Brazil <i>N.A. Nascimento, R.F.K. Puppi</i> .....	1897

## **Piled Embankments**

Foundation of a coal/coke stockyard on soft soil with geotextile encased columns and horizontal reinforcement <i>D. Alexiew, C. Moormann, H. Jud</i> .....	1905
The Dutch design guideline for piled embankments <i>S.J.M. van Eekelen, H.L. Jansen, P.G. van Duijnen, M. De Kant, J.H. van Dalen, M.H.A. Brugman, A.E.C. van der Stoel, M.G.J.M. Peters</i> .....	1911
Study of the load transfer mechanisms in reinforced pile-supported embankments <i>L. Briancon, Ph. Delmas, P. Villard</i> .....	1917
Piled embankments, influence of installation and type of loading <i>A. Bezuijen, S.J.M. van Eekelen, P. van Duijnen</i> .....	1921
Lateral deformation under the side slopes of piled embankments <i>K. Jennings, P.J. Naughton</i> .....	1925
Efficacy of geogrid in improving the load carrying capacity of stone columns <i>R.P. Bhyravajjula, R.V. Mukherjee, A.D. Chauhan, N.V. Lakshminarayanan</i> .....	1929
Influence factors on the performance of geosynthetic reinforced and pile supported embankments <i>B. Gebreselassie, J. Lking, H.-G. Kempfert</i> .....	1935
The Kyoto road piled embankment: 31/2 years of measurements <i>S.J.M. van Eekelen, A. Bezuijen, D. Alexiew</i> .....	1941

Incorporation of slack and creep in the British Standard code of practice for calculating tension and deflection of geosynthetic reinforcement used in column-supported embankments <i>M.P. McGuire, G.M. Filz</i> .....	1945
Model tests on group of geosynthetic encased stone columns <i>S. Murugesan, K. Rajagopal</i> .....	1949
New application of pile foundation to reinforced soil structure <i>T. Hara, S. Tsuji, A. Yashima, K. Sawada, N. Tatta</i> .....	1953
Additional reinforced embankment with vertical bearing piles <i>S. Tsuji, T. Hara, A. Yashima, K. Sawada, Y. Yokota</i> .....	1957
An experimental study to determine the location of the critical height in piled embankments <i>E.J. Britton, P.J. Naughton</i> .....	1961
Application of high strength geogrid as load transfer platform to wharf structure for a container terminal <i>T. Kulkarni, S. Ramasamy</i> .....	1965
Construction of the first railroad widening in the Netherlands on a Load Transfer Platform (LTP) <i>A.E.C. van der Stoel, C. Brok, A.P. de Lange, P.G. van Duijnen</i> .....	1969

## **Other Applications of Geosynthetics in Soil Reinforcement**

Hydraulic barrier performance of fiber-reinforced cement treated clay in large strain states <i>N. Kotake, M. Kamon, N. Takeuchi, T. Inui, T. Katsumi</i> .....	1975
Construction of a motoway section on potential sinkholes: reinforcement with an original very high tensile strength geogrid <i>G. Auray, P. Garcin, V. Vapper</i> .....	1979
Stress-dilatancy behavior of microreinforced sand <i>L. Festugato, N.C. Consoli</i> .....	1983
Bearing capacity of shallow foundations on reinforced clay soil <i>E. Güler, T. Yetimoglu, E. Cicek</i> .....	1989
Some observations on the mechanics of fibre reinforced sand <i>E. Ibraim, A. Diambra, D.M. Wood, A. Russel, K. Maeda</i> .....	1993
Effective shear strength of fiber-reinforced clays <i>B.J. Freilich, C. Li, J.G. Zornberg</i> .....	1997
Use of homopolymer polypropylene fiber for improving engineering characteristics of cement-stabilized soft clay <i>M.A. Shahin, L.P. Harris</i> .....	2001

Experience of geosynthetical material application for karst danger reduction of building base <i>A.B. Ponomaryev, V.I. Klevko, D.G. Zolotozubov</i> .....	2005
Experimental study of bearing capacity of strip footing on geogrid reinforced sand slope <i>M.S. Keskin, M. Laman</i> .....	2009
Experimental and numerical analysis of circular foundations rested on geogrid reinforced clay soils <i>M. Laman, A. Yildiz, M. Ornek, A. Demir</i> .....	2015
Chamber calibration of total stress cells in a fiber reinforced soil <i>M. Donato, A. Thomé, P.D.M. Prietto, N.C. Consoli</i> .....	2021
Micro-mechanical behavior of polypropylene fiber-reinforced soil <i>C.A. Ferreira, R.Q. Velloso, M.D.T. Casagrande, E.A. Vargas</i> .....	2027
Landscaping, architecture and a monument using a combination of soil reinforcing techniques <i>S. Biswas, A. Adhikari, D. Chauhan</i> .....	2031
Effects of fiber addition and evaluation of engineering performance on fiber reinforced concretes <i>J.S. Lee, H.-Y. Jeon, M.S. Kim</i> .....	2035
Use of woven geogrids under shallow foundations <i>J.P. Santos, E. Ananias, A. Santos, P.E. Rocha</i> .....	2041
Numerical analyses of the failure of geosynthetic-reinforced soil beneath shallow foundations subjected to inclined load <i>R. Berardi, R. Bovolenta</i> .....	2045
Behaviour fibre reinforced silty sand during compression at critical state <i>F. Ahmad, F. Batemi, M. Azmi</i> .....	2049
Reinforcement effects of high strength geosynthetic to embankment on liquefied ground <i>T. Konami, T. Ohwada, M. Kubo, H. Nakazawa</i> .....	2055
Experimental investigation on the mechanical behavior of fiber reinforced sandy gravel and fiber-reinforced fine sand <i>A. Flora, S. Lirer, L. Festugato, K.S. Heineck, N.C. Consoli</i> .....	2061
