

## TABLE OF CONTENTS

	page
<b>Introduction Lecture</b>	1
<i>Floss, R.</i> Design fundamentals for geosynthetic soil technique	3
<b>Mercer Lecture</b>	17
<i>Bathurst, R. J.</i> Reinforcement loads in geosynthetic walls and the case for a new working stress design method	19
<b>A – 1 Embankment on soft soil</b>	33
<i>Arab, R., Faure, Y. H., Lecendre, V., Gendrin, P., Douillat, M.</i> Embankment access road to a civil railway structure on soft soil	35
<i>Blume, K.-H., Glötzl, F., Lockemann, K.</i> Construction of the federal highway A 26 in Germany: Foundation of reinforced dams in soft soils - application of the control method according to DIN 1054 -	39
<i>Eberlein, S., Blaesig, J., Naciri, O.</i> Combination of stiff biaxial geogrids with soil stabilisation using vertical columns (CSV)	47
<i>Kassem, A., Imai, G.</i> Combined effects of geosynthetic cased sand compaction piles and preloading on the improvement of very soft ground	53
<i>Leupold, D., Oswald, K.-D., Heerten, G., Horstmann, J.</i> Practical experience with the covering of tailings and the use of geosynthetics in the framework of rehabilitation of WISMUT tailings ponds	61
<b>A – 2 Landfill</b>	65
<i>Allison, B., Herlin, B., Jetté, D.</i> Landfill remediation providing geosynthetic solutions / case study	67
<i>Berardi, R., Gualco, D.</i> Experimental and numerical analyses on the permeability of reinforced clay barriers	71
<i>Schmitz, S. M.</i> Measuring results on the landfill surface liner system “Asbach”	77
<i>Silvano, R., Lopes, M. d. L.</i> Diagnosis of landfill cover failure. The relevance of proper installation procedures.	83
<i>Vukelic, A., Kovacevic Zelic, B., Drnjevic, B.</i> Landslide at the Jakuševac landfill	87
<b>A – 3 Slopes and embankment</b>	93
<i>Brandl, H., Blovsky, S.</i> Protective barriers against rockfall	95
<i>Jost, A., Klinkemeyer, M., Tausch, N.</i> Geogrid reinforced retaining structure of Lauterecken landfill site	101
<i>Kollios, A.</i> Design and construction of a high embankment partly reinforced by geosynthetics	107
<i>Matys, M., Turinic, L., Baslik, R.</i> Geosynthetic reinforced high railway embankment: Design & Monitoring	111
<i>Saathoff, F., Werth, K., Klomp maker, J., Wittemöller, J., Vollmert, L.</i> Stabilisation of new real estate in Marbella/Spain with geogrid reinforced soil structures	117
<b>A – 4 Geocontainers</b>	121
<i>Bezuijen, A., de Groot, M.B., Klein Breteler, M., Berendsen, E.</i> Placing accuracy and stability of geocontainers	123
<i>das Neves, L., Gomes, F. V., Silvano, R., Lopes, M. L.</i> Sand-filled geotextile containers in dune erosion control a case study from the north western coast of Portugal	129

	page
<i>Heibaum, M.</i> Cost effective construction methods using geosynthetic containers	135
<i>Restall, S., Hornsey, W., Oumeraci, H., Hinz, M., Saathoff, F., Werth, K.</i> Australian & German experiences with geotextile containers for coastal protection	141
<i>Tonks, D. M., Parry, D., Howells, R., Smith, D. M.</i> River Mersey closure embankments: Applications of geobags and geosynthetics	147
<b>A – 5 Slopes and embankments</b>	153
<i>Herle, V.</i> Earth pressure reduction by geotextile-reinforced lightweight fill	155
<i>Kaga, M.</i> Mechanical model and experiments related to deformation of reinforced soil wall	159
<i>Mandal, J.N., Kumar, S., Sambasivarao, P.</i> Centrifuge modelling and finite element analysis of fiber reinforced fly ash slope	165
<i>Mathioudakis, M.</i> EPS as a lightweight fill behind bridge abutments founded on a landslide prone ground	169
<i>Watn, A., Øiseth, E., Aabøe, R.</i> Reinforced slope of road embankment with light weight aggregates	175
<b>A – 6 Geosynthetic clay liners</b>	181
<i>Henken-Mellies, W. U., Zanzinger, H.</i> Lysimeter field study of a clay geosynthetic barrier in a landfill cover system	183
<i>Marr, W.A., Christopher, B.</i> Slope design using GCLs in liner systems	189
<i>Rowe, R. K., Mukunoki, T., Bathurst, R. J.</i> Compatibility of a GCL with arctic diesel before and after freeze and thaw	193
<i>Schick, P., Schmitz, S.</i> X-ray tomography of structures in clay geosynthetic barriers (GBR-C)	197
<i>von Maubeuge, K.</i> Geosynthetic clay liners as environmental protection in infrastructure projects	203
<b>A – 7 Lining systems</b>	209
<i>Brummermann, K., Schlütter, A.</i> New German recommendations for geomembrane sealing systems in tunnel construction	211
<i>Du Preez, L. M., Hedrich, F.</i> Lining of an active gypsum tailings dam, south africa	215
<i>Flaquet-Lacoux, V., Fischer, S., Girard, H., Poulain, D.</i> Geomembrane liner systems on slopes in navigable canals: on site experimental stability study	221
<i>Gallagher, E., Needham, A., Smith, D.</i> Experience with geosynthetic design and construction of landfill steepwall lining systems	227
<i>Rollin, A. L., Jacquelin, T., Forget, B., Saunier, P.</i> A guide to detect leaks on installed geomembranes	235
<b>A – 8 Road constructions</b>	241
<i>Duškov, M., Yap, S.</i> Response analysis based on two-year monitoring of highway lightweight structures with EPS geofoam	243
<i>Höller, S., Sulten, P.</i> Concrete pavement on geotextile	249
<i>Hufenus, R., Rügger, R., Weingart, K., Banjac, R., Mayor, P., Springman, S. M., Brönnimann, R., Feltrin, G.</i> Reinforcing foundation layers on soft subgrade	255
<i>Watts, G.R.A., Blackman, D.I., Jenner, C.G.</i> The performance of reinforced unpaved sub-bases subjected to trafficking	261
<i>Wilmers, W., Kuhl, O., Beyer, H., Horstmann, H., Reuter, E.</i> Loadbearing behaviour of geogrids – large scale tests	267

	page
<b>A – 9 Piles and geosynthetics</b>	271
<i>Blümel, W., Heinemann, M., Werth, K., Müller, K.-D.</i> Road construction on a landfill with vibro concrete columns and geogrids	273
<i>Kempfert, H.-G., Göbel, C., Alexiew, D., Heitz, C.</i> German recommendations for reinforced embankments on pile-similar-elements	279
<i>Paul, A., Ponomarjow, A.</i> The bearing behaviour of geogrid reinforced crushed stone columns in comparison to non-reinforced concrete pile foundations	285
<i>Trunk, U., Heerten, G., Paul, A., Reuter, E.</i> Geogrid coated vibro stone columns	289
<i>Villard, P., Le Hello, B., Chew, S.H., Nancey, A., Delmas, P., Loke, K. H., Mannsbart, G.</i> Use of high strength geotextiles over piles results from a full scale test	295
<i>Wood, H., Horgan, G., Pedley, M.</i> A63 Selby Bypass - Design and construction of a 1.6 km geosynthetic reinforced piled embankment	299
<b>B – 1 Mechanical properties (friction)</b>	305
<i>Markou, I. N., Sirkelis, G. M.</i> Sand – woven geotextile friction angle by triaxial compression testing	307
<i>Moraci, N., Romano, G., Montanelli, F.</i> Factors affecting the interface apparent coefficient of friction mobilised in pullout conditions	313
<i>Rankilor, P. R., Karri, R. S., Dawber, R.</i> Particle interaction with reinforcement fibres and its implications on the use of nonwoven geotextiles in soil reinforcement	319
<i>Silvano, R., Pinho-Lopes, M., Marques, J. C., Lopes, M. d. L.</i> Pullout tests: experimental and numerical results.	323
<i>Teixeira, S. H. C., Bueno, B. S.</i> Evaluation of geogrid pullout behaviour in clayey sand using small-scale tests	327
<b>B – 2 Drainage of soft soil</b>	333
<i>Cortlever, N., Hansbo, S.</i> Aspects of vertical drain quality and action	335
<i>Gardoni, M. A., Palmeira, E. M.</i> The behaviour of partially clogged geotextiles under confinement	341
<i>Jarousseau, C., Gallo, R.</i> Drainage geocomposites: relation between water flow capacity and thickness in the long term	349
<i>Koerner, R.M., Soong, T.-Y.</i> Design of external drainage systems for segmental retaining walls	355
<i>Silva, A. F., Vidal, D.</i> Embankments on soft soil considering time effects on geosynthetics and on soil properties	361
<b>B – 3 Coastal and waterway construction</b>	365
<i>Artieres, O., Dunand, M., Durand, F.</i> Coastal protection with textile filter tube breakwater "Amelie" beach case	367
<i>Heerten, G., Horlacher, H.-B.</i> Reconstruction and improvement of dykes by using local soil and geosynthetics	371
<i>Hsieh, C., Lin, C.-K., Chiu, Y.-F.</i> The strength properties of geotextiles in ocean environment	377
<i>Schäfer, P., Strobl, T.</i> Hydrodynamic loads on geomembranes in open water canals	383
<b>B – 4 Slopes and embankments (Design)</b>	387
<i>Poulain, D., Girard, H., Glaud, V., Haddane, K.,</i> Stability and anchorage of geosynthetic systems on slopes: development of a new designing tool	389
<i>Rogbeck, Y., Franzén, G., Alén, C., Odén, K., Kjeld, A., Øiseth, E.</i> Nordic guideline for reinforced soils and fills	393

	page
<i>Thurlwell, P., Naciri, O., Huybregts, T.</i> A comparison of national design standards for the design of reinforced soil retaining walls	399
<i>Uchimura, T., Tatsuoka, F., Hirakawa, D., Shibata, Y.</i> Residual deformations of geosynthetic-reinforced soil structure subjected to sustained and cyclic loading	403
<i>Ziai, F., Paris, A..</i> Review and design approach of retaining structure built against and connected to a nailed embankment	409
<b>B – 5 Long term behaviour</b>	413
<i>Bartolomeo, P., Astruc A., Massieu, E., Barberis, N., Lavaud, S., Benneton, J. P.</i> Thermo-oxidative ageing of polypropylene geosynthetics monitored by thermal analysis and mechanical tensile tests.	415
<i>Lodi, P. C., Bueno, B. S.</i> Chemical compatibility of HDPE and PVC geomembranes	421
<i>Lopes, M. d. G. A., Barroso, M.</i> Mechanical performance of HDPE geomembranes seams after sunlight exposure	425
<i>Müller, W., Seeger, S., Thies, M., Gerloff, C.</i> Long-term shear strength of multilayer geosynthetics	429
<i>Onodera, S., Hirai, T., Hazama, A., Itagaki, S.</i> Long-term durability of geogrids laid in reinforced soil wall	435
<b>B – 6 Slopes and embankments (Facing)</b>	441
<i>Correia, A. S. C., Pinto, M. I. M., Lopes, M. L.</i> Brick faced reinforced retaining walls - comparisons between different design methods	443
<i>Freitag, N., Morizot, J.-C., Segrestin, P., Silveira Fernandes, K.</i> What connection to facing for polyester strips in mechanically stabilised earth walls?	447
<i>Herold, A., Stallmann, T., Reißhauer, P.</i> Vegetation and fire protection of GRE-supporting structures	451
<i>Jas, H.A., Naciri, O., Blume, U.</i> Various facings of geogrid reinforced soil retaining walls - constructions with more than 10 m	459
<i>Jenner, C. G., Naciri, O., Müller-Rochholz, J., Recker, C.</i> Influence of the efficiency of different connection details on the calculation of a reinforced soil system	465
<b>B – 7 Embankments in zones prone to subsidence</b>	469
<i>Briançon, L., Nancey, A., Caquel, F., Villard, P.</i> New technology for strain measurements in soil and the survey of reinforced earth constructions	471
<i>Paul, A.</i> Geosynthetic overbridging systems in areas prone to subsidence – a state report of the German standardization –	477
<i>Schwerdt, S., Naciri, O., Jenner, C.G.</i> Performance of aggregates in geogrid-reinforced soils used for protection against surface collapse into underground voids	483
<i>Wittke, W., Wittke, M.</i> Bridging of sinkholes with geosynthetics Design by 3D non-linear FE-analyses	489
<b>B – 8 Lining systems (monitoring)</b>	493
<i>Cartaud, F., Touze-Folz, N.</i> Influence of geotextiles at the interface of landfill bottom composite liners	495
<i>Janotka, I., Kišš, Š., Stejskal, F.</i> Geosynthetic cement-based liner (GCBL) for mechanical and corrosion protection of pipe-lines	501
<i>Needham, A., Gallagher, E., Smith, J.</i> Prediction of the long term generation of defects in HDPE liners	507
<i>Peggs, I. D., Nosko, V., Razdorov, P., Galvin, P.</i> Leak monitoring for a double liner separated by a novel conductive geotextile	515
<i>Schulz, H., Schmid, J.</i> An integrated approach to the location-based design of lining systems using the full range of geosynthetics	519

	page
<b>B – 9 Creep prediction</b>	525
<i>Greenwood, J. H., Kempton, G. T., Brady, K. C., Watts, G. R. A.</i> Comparison between stepped isothermal method and long-term tests on geosynthetics	527
<i>Kongkitkul, W., Hirakawa, D., Uchimura, T., Tatsuoka, F.</i> Loading rate effects due to viscous property on the strength and deformation property of geosynthetic reinforcement	533
<i>Narejo, D., Allen, S.</i> Using the stepped isothermal method for geonet creep evaluation	539
<i>Stevenson, P., Lozano, R.</i> Evaluation of polyester reinforcement for long term durability	545
<i>Wrigley, N. E., Wei, L., Junyi, P.</i> Accelerated creep testing and quality assurance	551
	557
<b>C – 2 Special reinforcement</b>	
<i>Aydogmus, T., Alexiew, D., Klapperich, H.</i> Investigation of interaction behaviour of cement-stabilized cohesive soil and PVA geogrids	559
<i>Falorca, I. M., Pinto, M. I. M.</i> Silty clay reinforced with short length synthetic fibres randomly oriented	565
<i>McGown, A., Kanyoza, A., Doctor, R.</i> A comparison of mesh elements and short fibres for the micro-reinforcement of granular soils	569
<i>Palmeira, E. M., Lima jr., N. R., Viana, H. N.L., Mello, L. G. R.</i> Large Scale Ramp Tests for the Study of Soil-Geosynthetic interaction in slopes of waste disposal areas	575
<i>Preiß, O., Amann, P.</i> Usage of polyvinyl alcohol (PVA) fibre as slurry wall reinforcement material for the two-phase-process	581
	585
<b>C – 3 Mechanical properties (damage, energie concept)</b>	
<i>Atmatzidis, D. K., Chrysikos, D. A., Missirlis, E. G.</i> Correlations between nonwoven geotextile mechanical properties	587
<i>Müller-Rochholz, J., Mannsbart, G.</i> Installation stress testing – results and interpretation	593
<i>Naughton, P.J., Kempton, G. T.</i> The value of strain energy as a characterisation parameter	597
<i>Paula, A. M., Pinho-Lopes, M., Lopes, M. d. L.</i> Damage during installation laboratory test. Influence of the type of granular material.	603
<i>Steen, E. R.</i> Designing with geotextiles based on stress energy factors	607
	611
<b>C – 5 Dynamic behaviour</b>	
<i>Carotti, A., Graziano, P., Rimoldi, P.</i> Shear type continuous model for seismic dynamics of reinforced soil structures	613
<i>Eiksund, G. R., Hoff, I., Perkins, S.</i> Cyclic triaxial tests on reinforced base course material	619
<i>Güler, E., Bakalci, E.</i> Parametric seismic analysis of tiered geosynthetic-reinforced segmental retaining walls	625
<i>Incecik, M.</i> Earthquake performance of two steel tanks on geotextile reinforced earth	631
<i>Meyer, N., Nernheim, A., Köhler, U.</i> Geosynthetic – soil interaction under cyclic loading	635
	641
<b>C – 7 Effective reinforcement design</b>	
<i>McGown, A., Kupec, J.</i> A new approach to the assessment of the behaviour of geogrids subject to biaxial loading	643
<i>Rankilor, P. R.</i> The construction of self-loading micro-models of reinforced soil using ultra-weak reinforcement simulants	649

	page
<i>Retzlaff, J., Recker, C.</i> From laboratory tests to geotechnical practice - pullout and direct shear tests for geotechnical calculations -	655
<i>Ziegler, M., Timmers, V.</i> A new approach to design geogrid reinforcement	661
<b>Postersession</b>	667
<i>Banjac, R., Mayor, P. A., Hufenus, R.</i> Plate loading tests on a geosynthetic reinforced shallow embankment: field measurements and numerical modelling	669
<i>Carotti, A., Di Prisco, C., Vecchiotti, M., Recalcati, P., Rimoldi, P.</i> Modelling of geogrid reinforced embankments for rockfall protection	675
<i>Dash, S., Rajagopal, K., Krishnaswamy, N.R.</i> Load carrying mechanism of geocell reinforced earth slabs supporting a strip footing	681
<i>Ghionna, V.N., Olivetta, M., Vicari, M.</i> Interpretation of pullout and direct sliding tests for a double twist steel wire mesh reinforcement	683
<i>Ghosh, C., Yasuhara, K., Komine, H., Murakami, S.</i> Clogging and drainage characteristics of permeable geosynthetics in improving fine-grained soil	689
<i>Jeon, H.-Y., Lee, J.-Y., Lyoo, W.-S., Byun, S.-W.</i> Protection and drainage properties of geotextiles by installation damage	693
<i>Jeon, H.-Y., Mok, M.-S., Kim, Y.-K.</i> Analysis of creep behaviors of geosynthetic reinforcements by newly designed test method	697
<i>Katsumi, T., Ogawa, A., Fukagawa, R.</i> Effect of chemical solutions on hydraulic barrier performance of clay geosynthetic barriers	701
<i>Kazimierowicz-Frankowska, K.</i> Experimental study on pre-failure behaviour of reinforced walls	707
<i>Köditz, J., Witt, K. J., von Maubeuge, K. P.</i> Laboratory tests on the effect of static load to the desiccation of GBR-C	711
<i>Kupec, J., McGown, A., Ruiken, A.</i> Junction strength testing for geogrids	717
<i>Lo Grasso, A. S., Maugeri, M., Montanilli, F., Recalcati, P.</i> Response of geosynthetic-reinforced soil walls under seismic condition by shaking table tests	723
<i>Lodi, P. C., Bueno, B. S.</i> Degradation of HDPE and PVC geomembranes exposed to heat	729
<i>Mathioudakis, M., Dickson, T. H.</i> Tire shred embankment: design and construction considerations verification through instrumentation monitoring results	733
<i>Matveyev, S. A., Nemirovsky, Y. V.</i> The general theory of thermoelastic multilayers road plates, reinforced with geosynthetic materials	739
<i>Mica, L., Uhrin, M., Vesely, J.</i> Laboratory testing of geosynthetics on reinforced foundation ground	745
<i>Missirlis, E. G., Atmatzidis, D. K., Chrysikos, D. A.</i> Compressive creep behavior of EPS geofoam	749
<i>Rankilor, P. R., Karri, R. S., Dawber, R.</i> The development of a new inexpensive apparatus fo the measurement of friction between sand and low strength geotextiles	755
<i>Shtabinsky, V., Yaromko, V.</i> Application of reinforcing geotextile interlayers for the purposes of sub-grade reconstruction on soft soils	759
<i>Southen, J. M., Rowe, R. K., von Maubeuge, K.</i> The prediction of thermally-induced desiccation in geosynthetic clay liners used in landfill basal liner applications	761
